✉ [fengziqing970202@gmail.com](mailto:fengziqing970202@gmail.com)  
☎ +86 19558152283

## Skills

**Development** : C++, Python, Bash, JavaScript, React, Next.js, TypeScript, Node.js, Express.js, HTML, Tailwindcss, CSS, Objective-C, C.

**Version Control** : Git.

**Other** : Unit Testing, Gtest, CI/CD, JIRA, Confluence, Slack.

**Framework** : PyTorch.

**Languages** : Chinese, English, Japanese - All professional proficiency or above.

## Experience

**Software Engineer** Huawei, YinWang (outsourcing) *September 2024 - September 2025*

- AITO M9 In-Car Motion Gaming (Industry First) : As a core developer, **conducted model research, training, and optimization** using **PyTorch** to solve low-light recognition (30% up). Implemented 3 high-precision gesture recognition algorithms (**C++**), maintaining a stable detection rate of over 99% in vehicle environments. Wrote and maintained **unit tests** for C++ modules, achieving over 80% branch coverage to ensure code reliability. The flagship feature achieved over 20,000 Weekly Active Users on the M9.
- **AITO M9 Gesture-Controlled Door (Industry First)**: Played a key role in the end-to-end development : conducted model investigation and validation (PyTorch), and implemented the core functionality (**C++**). Contributed to API design and verification, ensuring robust system integration. The launched feature achieved over 85% detection rate and a 40% user adoption rate via OTA in its first month.
- CI/CD Pipeline Improvement : Redesigned and **optimized CI/CD build scripts (Bash)** to support automated multi-repository fetching and compilation. This enhancement established the foundation for scaling team projects by enabling parallel development.
- Root-caused and fixed a persistent crash caused by a dangling pointer from flawed thread lifecycle management, permanently resolving the issue.

**FullStack Engineer**

*October 2023 - September 2024*

- Developed my **own portfolio website**, including design, UI, frontend and backend.

**Client Engineer** ZOOM

*June 2022 - October 2023*

- Led the development of validation scripts(**Python**) for ZOOM Mac client in all 16 languages, covering the entire process from requirements analysis to script development, testing, and automation. Utilized Python to implement checks for translation accuracy, text formatting, and placeholders across the diverse language set.
- Led the design and development of a new feature which aimed at enhancing user engagement for unregistered users, embraced by millions of non-enterprise users daily, has become instrumental in generating millions of dollars in revenue for ZOOM each quarter.

## Certifications

**International English Language Testing System(IELTS) 6.0**

**Japanese Language Proficiency N1** : The highest-level certificate of Japanese proficiency (24.1% Pass Rate)

## Education

**Master of Computer Science in Human-Computer Interaction**, 2020 - 2022  
Ochanomizu University (one of the top national universities in Japan)
